Hi all

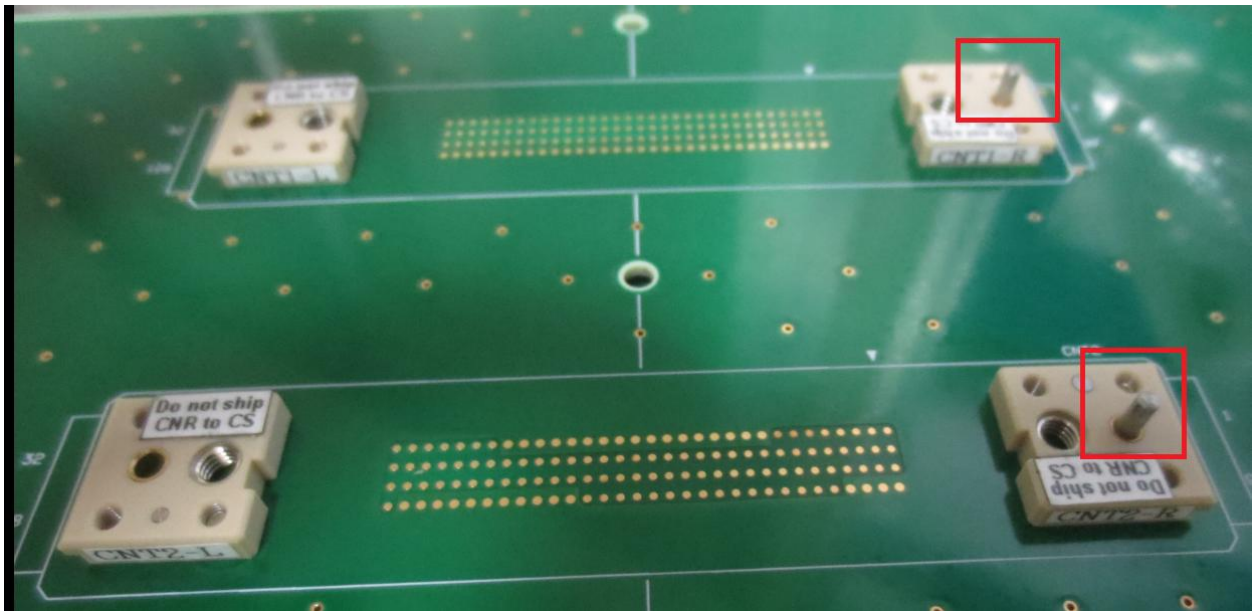

we cannot install full alignment pins for PCA CNR so holes of parts on PCB is round à it
have tolerance à this PCB can install but others cannot

Just thinking out solution: cut slot on PCA CNR and insert alignment pin on PCB to align

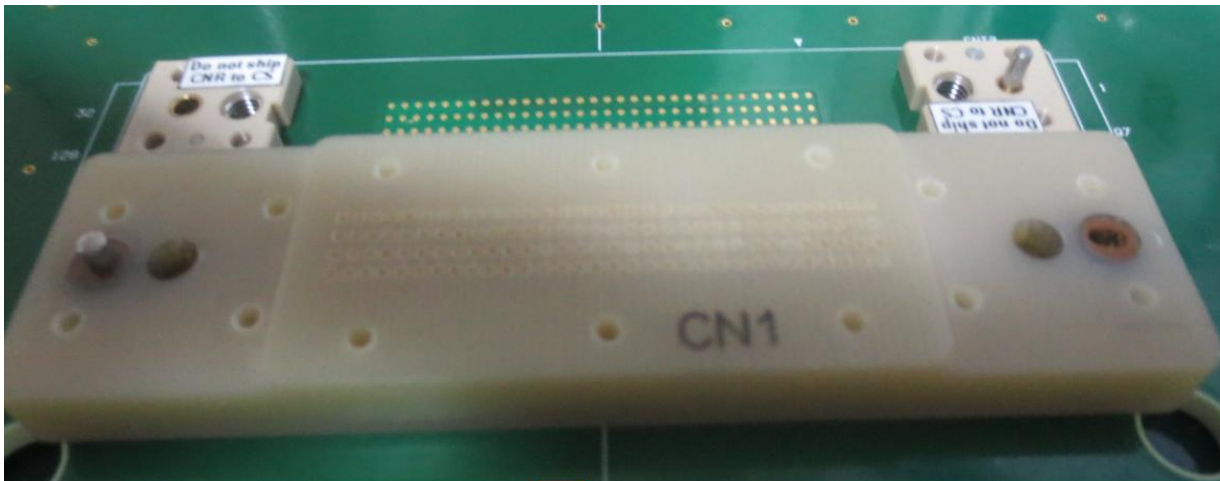

Pls follow as below for setup CNR for PCA test

1. Insert pins to PCB first

2. Install connector as normal:

3. After finished card remove 2 align pins and store in box to use in next time

Thanks

Giang Xuan Hoang

Hi PCA Leaders,

Pls help to show below issue to your team to take a note and ask them must follow below preventive actions strictly while waiting for studying to build new CNR with full Alignment pin.

We are having many Asahi Kasei cards that will ship out tomorrow. Pls note to prevent this issue repeat again.

Preventive Action :

- Show this issue to PCA team to take a note while install CNR into this PCB type.

- Don't allow to pull CNR up/down to solve offset between CNR with PCB à Must remove CNR and install again to solve offset.

Thanks & Regards!

Hi a.Khoa,

Pls see below for our investigation result on issue#2 "scratches on the pogo pads". Pls give more your advice/comment if need ...

+ **Problem Description**: There are scratches on the pogo pads.

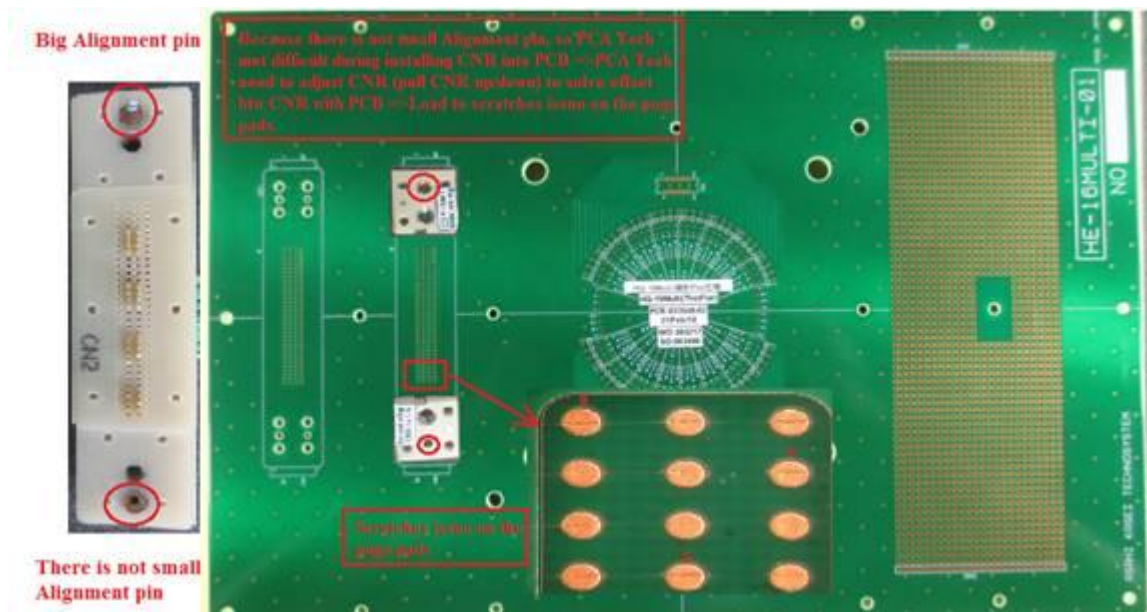

+ **Investigation Finding**:

- 21/Feb/2018: VN shipped total 5 cards (WO#484212~14, 484217, 484301).

- 23/Feb/2018: CS feedback: there are scratches on the pogo pads. In last time, VN also shipped very many cards with same this PCB type without any defect as this issue.

- Actually VN also detected this issue at outgoing but so that catch shipment at that day, VN considered to keep this issue as is to ship the card out.

- This issue was happened during installing CNR for PCA testing. PCA Tech met difficult while install CNR into the PCB because VN CNR only has one big Alignment pin, there is not small Alignment pin so PCA Tech need to adjust CNR (pull CNR up/down) to solve offset between CNR with PCB à Lead to happen scratches issue on the pogo pads. Pls see below picture to refer.

+ **Root cause of problem** : CNR has not full Alignment pins.

+ **Corrective Action** : Keep this issue as is to ship card to catch shipment.

+ **Preventive Action** :

- Show this issue to PCA team to take a note while install CNR into this PCB type.

- Don't allow to pull CNR up/down to solve offset between CNR with PCB à Must remove CNR and install again to solve offset.

- Study to build new CNR with full Alignment pins to solve offset issue between CNR with PCB.

Thanks & Regards!

Hi Stephane,

Noted.

Hi The and VKhoa,

Pls investigate and take actions for these 2 issues

Best Regards

Khoa Cong Nguyen

Hi Cong Khoa,

Can you help solving 2 issues with these probe cards for Asahi Kasei.

1)

The packing of these cards only includes 2 foams instead of 3, this is not very secured.

Please help to take necessary measures at QA so we have 3 foams, consider have TA modify all BOMS for all probe cards using this case so there are systematically 3 foams when you purchase the cases.

2)

There are scratches on the pogo pads.

See attached pictures.

Thanks in advance for your help.

Stephane.

This is an auto notification that your order from SV Probe has shipped:

Company name: **SV TCL KK.**

Ship to: **SV TCL KK.**

Product: **HG08-16MULTI(THIN_FLAT),ASAHI KASEI**

Partno: **PCR-032885-02**

Qty: **1**

Order #: **063495-0001**

PO #: **SVTCL-N080365**

Customer Serial #:

Internal Serial #:

Tracking#: **6614 8121 5078**

Ship Via: **Fed ExInternational** [click here](#) for more details.
